

June 20th, 2040.

Dear European citizens,

I have no words, thank you for your vote of confidence, we will not let you down. In the past few days we focused our efforts in speaking with other parties, in order to be able to form a solid coalition of government capable of running this country smoothly.

As predicted, the forces of progress decided to unite under a single banner in the name of the future, the very same forces that always fought for the creation of a Federal Europe, the very same forces that always looked for a brighter future.

And with that being said, I hereby announce the creation of a new Federal Government, along with the Alliance of Liberals and Democrats and the European United Left, with me, as Supreme Chancellor of the European Federation.

Our main goal will always be the happiness of our citizens, achieved through concrete pro welfare policies, expansion in space, and fight against the climate change.

We hope that the Chamber of the Macroregions, as soon as elected, will vote in favor of plans that will actually benefit the entire country and not just few people.

The new government will now start working over the first election of the Council of the Euro-Wises, and we will do our part in choosing part of it, may the brightest and talented wises watch over our actions.

I also want to personally wish the best to the captain of the new vessel EFS Spinelli, Alexandre Gutierrez, have a safe journey in space and make Europe proud.

I will never get tired to say that it's now time to look at the sky for all the answers we need. May this be the dawn of a new era of peace and prosperity of the entire human race.

Long live Earth!  
Long live Europe!

Elly Schlein, Supreme Chancellor of the European Federation.
